

AVT® EZ VALVE®

80mm data sheet

AVT EZ VALVE 80MM

The award-winning AVT EZ Valve is the best choice for emergency repairs and the smartest solution for planned and emergency pipeline maintenance on 80mm diameter lines.

This inline insertion valve can be installed on horizontal or vertical lines. The AVT EZ Valve installs on an active line, so there is no need to turn o the water flow. This means fixing a line is fast, with fewer disruptions to businesses and residents and less cost and risk for owners and operators. On pipe diameters of 80mm these valves normally can be installed in around an hour.

Ranked among the industry's most innovative solutions, the light and compact AVT EZ Valve is designed with a built-in isolation gate that allows the valve to be installed under pressure, a design feature that permits flow through the line while the repair is being made. It is durable, reliable, and certified to industry standards.

BENEFITS & VALUES:

- No water shutoff required during installation
- No service interruption
- · No fines for water shutoff
- No boil orders
- · No customer notices
- No risk of plugging the line with a cut coupon
- No loss of pipe integrity
- Four times quicker to install than other valves on the market
- Only one excavation required for water line repair

APPLICATIONS:

- Municipal water networks
- Transmission and distribution lines
- Wastewater treatment plants
- · Sewer force main
- · Refining and petrochemical plants
- Offshore applications
- Commercial buildings / isolation
- · High-rise buildings
- Multiple occupancy buildings
- Industrial process piping
- · Ground storage tank isolation

FEATURES

DESIGN

Unique, patented technology

Low profile design

Ductile iron castings

Integrated isolation valve

Patented multichannel double-seal gaskets conform to irregular pipe geometries and sizes

Size 80mm

INSTALLATION

Can be installed on all common pipe materials

Customizable for special applications (sleeves to meet steel pipe ODs)

Installs at any angle

Valve bonnet can be removed after a repair or remain in place as a permanent functioning valve

SAFETY

Epoxy Coated

Stainless steel fasteners for secure positioning

Working pressure of 250 PSI, (17 Bar) – Tested Pressure to 375 PSI (26 Bar)

EZ Valve Components are WRAS Certified, meet AWWA C-509/C515 standards and UL Classified to NSF/ANSI Standard 61, Drinking Water System Components - Health Effects

INSTALL PROCESS

Prepare **Insertion Site**

Prepare insertion site by lubricating the gasket and contact areas

Lubricate Gasket Sets & Channels

Lubricate gasket sets and gasket channels in casting bodies

Assemble Ductile Iron Castings

Assemble ductile iron castings with stainless steel fasteners to accept a pressure test and temporarily allow rotation for milling

4 Attach EM Machine

Check integral isolation gate is fully open, fit rotation assembly, attach EM machine and pressure test

Mill A Slot Over a 120° Path

Maintaining system line pressure, mill a slot over a 120° path (Note: The slot normally is cut to provide for vertical valve alignment, but the installer can select any position.)

Retract The Milling Head

Retract the milling head, close the integral isolation gate. Replace the EM Machine with the resilient wedge bonnet, remove the rotation assembly and tighten casting fasteners to specified torque values

Open and Operate

Open the integral isolation gate and operate the AVT EZ Valve. For line stop applications, replace the valve bonnet with a blind flange using the integral isolation gate

CUT AWAY VALVE WITH KEY

Actuator

Standard number of turns to open and close valve

Removable Valve Bonnet

Resilient wedge gate and actuation mechanism are contained for fast and easy installation or removal

Gasket & Channel

Maintain system pressure while allowing rotation of casting assembly during slot-milling

Fasteners

Stainless steel components secure casting assembly and provide final positioning on pipe

Pipeline Compatibility

The EZ Valve design works with most metallic pipes, AC and PVC materials

Resilient Wedge

A wedge gate over a ductile iron frame that effectively seals even tuberculated host pipe

Integrated isolation valve

Provides "under pressure" installation or removal of valve bonnets or blind flanges

Insertion Slot

One narrow slot over a 120° path maintains pipe integrity and creates resilient wedge access

Castings

Ductile iron castings are precision machined to fit project specifications and pipe material

80MM EZ VALVE DIMENSIONS & DIAMETRICAL RANGE

WEIGHT

Size	Weight
80mm	24kg

DIAMETRICAL RANGE

Pipe Size	Diametrical Range
80mm	86.5mm to 101mm

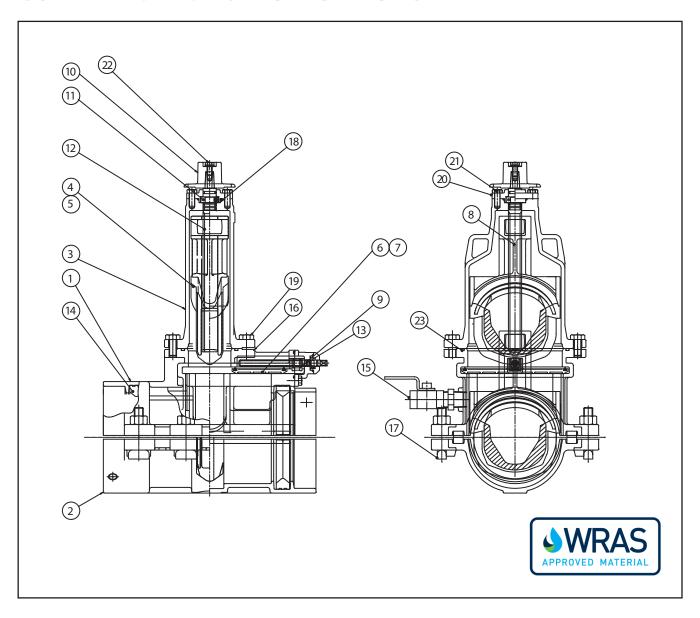

INSTALLATION

Size	Clean Pipe
80mm	865mm

SIZE

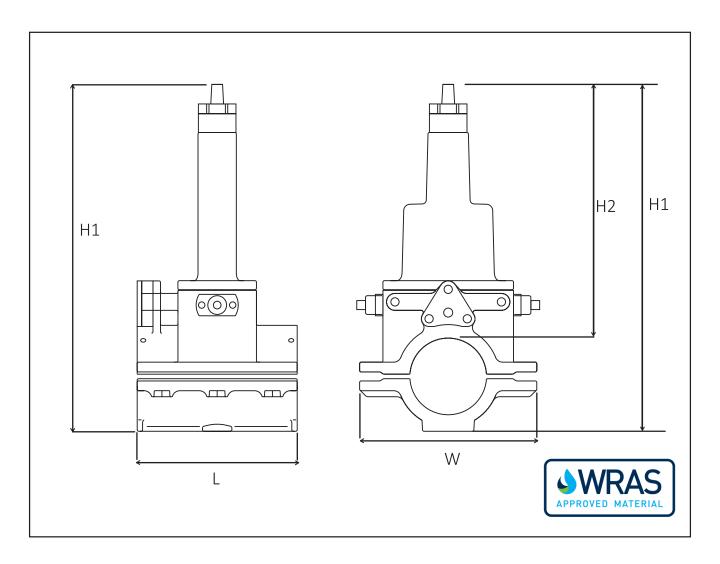

Size	Height (H1)	Height (H2)	Length	Width
80mm	486mm	354mm	225mm	236mm

80MM EZ VALVE SPECIFICATIONS

Item No	Description	Material
1	Upper Half of Body	DUCTILE IRON
2	Bottom Half of Body	DUCTILE IRON
3	Bonnet Body	DUCTILE IRON
4	Gate	DUCTILE IRON
5	Gate Rubber	EPDM
6	Isolation Gate	DUCTILE IRON
7	Isolation Gate Rubber	EPDM
8	Stem (Feed Screw)	STAINLESS STEEL
9	Isolation Gate Stem	STAINLESS STEEL
10	Wrench Nut	DUCTILE IRON
11	Set Collar	BRASS
12	Stem Nut	BRONZE
13	Isolation Gate Stem Nut	BRONZE
14	Gasket	EPDM
15	Chip Flushing Port	
16	EM Cutting Port	
17	Body Fasteners	DUCTILE IRON
18	O-Rings	BUNA-N
19	Bonnet Bolts	STAINLESS STEEL
20	Packing Gland	DUCTILE IRON
21	Packing Gland Bolts	STAINLESS STEEL
22	Bolt for Wrench Nut	STAINLESS STEEL
23	Bonnet O-Ring	EPDM

EZ VALVE WITH OPTIONAL ACTUATOR SUPPLIED

SPECIFICATIONS

- 1. Bottom Half Body: DI. ASTM A536 65-45-12
- 2. Upper Half Body: DI. ASTM A536 65-45-12
- 3. Bonnet: DI. ASTM A536 65-45-12
- 4. Gate: DI. ASTM A536 65-45-12
- 5. Gate Rubber Coated: EPDM ISO 4097:2014

- 6. Stem: Stainless Steel 17-4PH
- 7. Gasket: EPDM ISO 4097:2014
- 8. Set Collar: Bronze C954 (AWWA C-509-01)
- 9. Stem Nut: Bronze C954 (AWWA C-509-01)
- 10. Wrench Nut: DI. ASTM A536 65-45-12

Warranty: A One Year warranty covers parts and labor for Equipment and Valves (Excluding Perishable Tooling and O-Rings) barring misuse or lack of routine maintenance.

Advanced Valve Technologies (AVT) is part of ClockSpringINRI, the high-performance critical infrastructure solutions company. AVT's advanced solutions are based on simple designs that minimize risk to the environment and reduce costly downtime. Our primary focus is on disruptions in water service that cost providers money and leave end users without service.
