**Inhalation:** If inhaled remove to fresh air.

**Ingestion:** If swallowed do not induce vomiting. Rinse mouth with water. Obtain medical attention.

**Eye contact:** In case of contact, rinse thoroughly with plenty of water, also under the eyelids for at least 15 minutes. Get medical attention immediately if irritation develops and persists.

**Skin contact:** Remove contaminated clothing and shoes. Wash affected skin with soap and plenty of warm water. Do not reuse contaminated clothing until cleaned.

##### **Most important symptoms/effects, acute and delayed:**

**Eye contact:** Temporary irritation (itching) or redness may occur.

**Skin contact:** Temporary irritation (itching) or redness may occur.

**Inhalation:** Irritation of the upper respiratory tract (scratchy throat), coughing, and congestion may occur in extreme exposures.

**Ingestion:** This product is not intended to be ingested (eaten). If ingested, it may cause temporary irritation to the gastrointestinal (digestive) tract.

**Indication of immediate medical attention and special treatment needed:** No information available.

#### Section 5. Fire Fighting Measures

**Suitable Extinguishing Media:** For suitable extinguishing media, use Alcohol-resistant foam (on small fires), carbon dioxide, dry chemical, water spray.

**Unsuitable Extinguishing Media:** For unsuitable extinguishing media, use water spray jet

##### **Special Fire Fighting Procedures:**

**Special Protective Equipment and Precautions for Fire-fighters:** Burning produces irritant fumes. Exposure to decomposition products may be a hazard to health. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Full protective flameproof clothing.

**Specific Hazards Arising from the Chemical (Under Fire Conditions):** Carbon oxides, nitrogen oxides, Other hazardous decomposition products may be formed.

#### Section 6. Accidental Release Measures

**Personal Precautions, Protective Equipment and Emergency Procedures:** Do not touch or walk through spilled material. Provide adequate ventilation. Wear respirator and personal protective equipment as appropriate

to prevent skin and eye contact. If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

**Environmental Precautions:** Material should not be released into the environment. Prevent product from entering drains.

**Methods and Materials for Containment and Cleaning Up:** Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Large spills should be collected mechanically (remove by pumping) for disposal. Dam up.

#### Section 7. Handling and Storage

**Precautions for safe handling:** Put on appropriate personal protective equipment (see Section 8). Handle in accordance with good industrial hygiene and safety practice. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Purge containers with dry nitrogen before resealing. Do not use spot heating devices such as band heaters or torches. Make sure contents are completely liquid and uniform before using.

**Conditions for safe storage including any incompatibilities:** Keep in a dry and cool place away from incompatible materials (see Section 10). Avoid contact with moisture and prolonged exposure to temperatures above 140°F (60°C). Keep container tightly closed and sealed until ready for use. Do not store in unlabeled containers.

#### Section 8. Exposure Controls / Personal Protection

##### Control Parameters (Exposure Limits):

Component	Exposure limits		
	ACGIH	NIOSH	OSHA-PELs
E-glass continuous filament	5 mg/m <sup>3</sup> (Inhalable) (TWA) 1 fiber/cm <sup>3</sup> TWA (respirable)	ND	5 mg/m <sup>3</sup> (respirable) 15 mg/m <sup>3</sup> (total dust)

**Appropriate Engineering Control:** No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

##### Personal Protective Equipment:

**Respiratory Protection:** When workers are facing concentrations above the exposure limit, they must use appropriate certified respirators.

**Eye / Face Protection:** Wear appropriate safety glasses with side shields.

**Skin Protection:** Permeation resistant impervious gloves. Cover as much of the exposed area as possible with protective clothing.

**Additional protective measures:** Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
